DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-34, drawn to extended release or controlled release, classified in class 424, subclass 457.
 - II. Claims 35-47, drawn to pulsating release encapsulated product, classified in class 424, subclass 457.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as extended/controlled release and pulsating release. The mechanism of action of extended/controlled release is different from the mechanism of action of pulsating release and this distinction is art recognized and capable of supporting different patents within the art.

If applicants elect group I, applicants must further elect one of the following classes of pharmaceuticals.

- a. A psychotropic and applicants must further elect one psychotropic agent from anti-anxiety therapeutic, insomnia therapeutic and anti-depressant (claims 13-16).
- b. A gastrointestinal therapeutic and applicants must further one gastrointestinal therapeutic agent from ulcer therapeutic, anti-emetic and anti-diarrheal therapeutic (claims 19-28).
- c. A migraine therapeutic.
- d. A hypertension therapeutic.

Art Unit: 1615

Applicants are required under 35 U.S.C. 121 to elect a single disclosed therapeutic agent for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable

Applicants are advised that a reply to this requirement must include an identification of the therapeutic agent that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional therapeutic agents which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected therapeutic agent. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. A telephone call was made to Gerald Meyer on 01/14/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1615

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
